

2024

RELIABILITY WHEN IT COUNTS

Ektor is a star of the Emergency Lighting Industry. Founded in 2004, it was the first to use LED exits, introduced the first DALI range in 2006, achieved the first DALI-2 certified emergency exit, and the first to build wireless connectivity on IEC 62386-104.

With so many 'firsts' it's no surprise Ektor is at the forefront of compliance, design and testing.

Designed in Australia, for Worldwide conditions, Ektor maintains complete production control throughout the entire manufacturing process.

zencontrol

zencontrol is the parent company of Ektor and aims to deliver a wide range of reliable products at an affordable price.

zencontrol invests heavily in research and testing, with stringent internal due diligence and compliance, and safety testing carried out by third parties.

IF IT DOESN'T MEET OUR HIGH STANDARDS FIRST, IT'S BACK TO THE DRAWING BOARD

LYNK

WIRELESS CONTROL WITHOUT COMPLICATION OR MESS

Help meet regulatory compliance with **Lynk**, Ektor's wireless test and monitoring solution.

Simple and easy to use, the **Lynk Wireless Solution** reduces the substantial ongoing maintenance and testing costs required for emergency lighting compliance.

THE BEST WIRELESS EMERGENCY SOLUTION

Lynk's sophisticated mesh connectivity exhibits real-time reporting, with expansion capacity across wired and wireless networks.

Behind a simple, easy-to-use interface, a powerful, self-linking, self-healing solution resides. Providing ultra-fast wireless connectivity, **Lynk** has no need for additional cables or wires, making it easy to deploy or retrofit.

Why Lynk?

- Built on DALI+ technology allowing for open source connectivity
- Easy to install with no additional wires or cables
- Suits any size installation
- Intelligent meshing technology with a powerful, self-linking and self-healing system
- Protected cloud-controlled platform allowing managed multi-user and multi-tenancy access controls
- Real-time reporting with expansion capacity across wired and wireless networks
- Built on IEC62386-104 - the only IEC standard for wireless lighting control

LYNK

REGULATORY COMPLIANCE

Save money and help achieve building compliance with the *Lynk Wireless Solution*.

Lynk is designed to integrate and work with the zencontrol cloud platform, a system tested and certified to IEC62034 by TÜV Rheinland.

This additional testing ensures it meets the requirements of a safe and reliable monitoring system.

IEC62034 by TÜV-SÜD

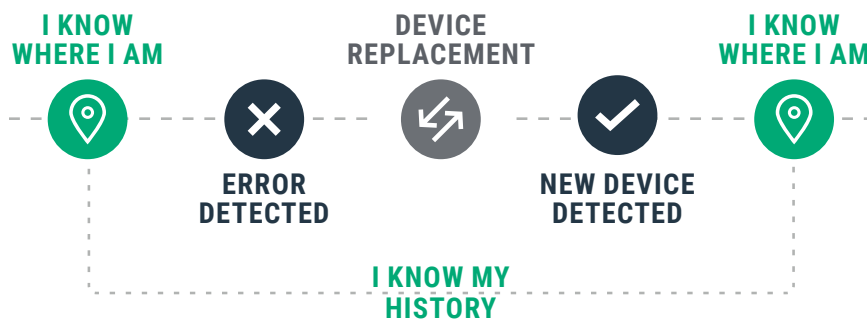

zencontrol system

TEST MANAGEMENT & TRACEABILITY

Ektor emergency testing provides a full test management solution. Instead of tracking and testing individual emergency devices, the *Lynk* system is **based on the location of each unit**. With this method, the addition, replacement or removal of emergency devices maintains a full, 'through-life' traceability.

This test management system eliminates the issue of devices being removed from the network without due process. For each test session, all changes, repairs and results are tracked and reported together to provide full test details.

THREAD, WIRELESS MESH CONNECTIVITY

Lynk emergency products are equipped with **state-of-the-art wireless meshing technology**. This connects nearby devices, creating a network for control and reporting.

The self-healing mesh makes *Lynk* easy to deploy or retrofit, as the emergency luminaries require no additional wire. The Bluetooth commissioning interface provides installers a quick and easy connection to the device, making configuration simple.

For Site Managers, compliance is improved and liability is reduced with the zencontrol cloud platform. Integrated with ***Link***, this solution automatically backs up and stores all test results and maintenance data off-site.

DEVICE REPLACEMENT

HISTORY STORED IN THE CLOUD

COMPLIANCE

Through design, testing, quality systems, and representation, Ektor proves its ongoing commitment to compliance and reliability.

THIRD-PARTY TESTING

Ektor third-party testing is carried out by NATA certified test laboratories (The National Association of Testing Authorities) and ILAC MRA laboratory accredited bodies.

Testing laboratories with an approved scope and certification from NATA and ILAC MRA produce test reports with either the NATA or ILAC MRA symbol. This official stamp is critical to ensure all tests have been performed correctly.

Overseas testing laboratories, with approved scope, who are authorised signatories to the ILAC mutual recognition arrangement (MRA), carry certification from their respective national agency.

Examples of valid certified reports are detailed below:

- Australia – NATA
- Australia/New Zealand – JAS-NAS
- China – CNAS
- Japan – JAB
- Germany – DakkS

QUALITY SYSTEM

Reliability, certification, procedure.

A product carrying safety certification does not guarantee the product supplied to market is safe. Changes in the supply chain, in-house and on-line testing, and other variables, all need to be managed to ensure a consistently safe product.

Our systems, standards and procedures will deliver consistently safe, reliable, and repeatedly positive and proven outcomes in manufacturing.

AUSTRALIAN OWNED

Ektor's emergency products are manufactured in Australian owned and operated factories, certified and audited to ISO9001:2015 and ISO14001:2015 and are Sedex registered. Quality and reliability are of the highest importance, demonstrated to our customers time and time again.

FULL-CYCLE TESTING

Every range in the Ektor suite is subject to a full-cycle test before being packed and shipped. This rigorous process can take up to 32 hours and includes a complete charge, discharge and re-charge, ensuring products meet the requirements of our customers and our environment.

DESIGN LIFE

Warranties form our guarantee and the assurance we will stand behind our products, but more important than a product warranty is its design life. Customers pay significantly when the warranty of the product does not reflect the design life. A reduced design life results in more replacements and costs through the life of the product, regardless of the warranty period. It is always best practice to consider the product design life to ensure the lowest total cost of ownership

Design life criteria takes into consideration the requirements and performance needs of the product type. The design life of each Ektor product is calculated at its maximum rated ambient temperature for a true representation.

To achieve the highest design life with all Ektor products we use only quality materials and manufacture to endure the harshest of operating conditions. The size and rating of all components, including the capacitors, are de-rated and sized to provide the longest possible design life. All LEDs, batteries, and the battery capacity are carefully considered so products meet the rated duration throughout their life.

Our expertise in battery technology and degradation allows us to design Ektor products with the longest possible battery life and lowest cost of ownership.

Our range of exits come in a variety of styles, sizes and mounting options. The Razor (pictured) is available in standard white or black. Its quality design ensures maximum luminance while reducing glare, external light reflection and unevenness.

EXIT SIGNS

FEATURES

EXCELLENT LUMINANCE

A quality design ensures maximum luminance while reducing glare, external light reflection and unevenness.

DECALS INCLUDED

Decals are included and can be mounted on both sides. They can also be purchased separately as an accessory.

LITHIUM BATTERIES

All Ektor exit signs use quality Lithium LiFePO₄ batteries. These are environmentally friendly and allow for maximum charging efficiency.

EK-LED FIRE-B-LK		
Ledfire Surface Mounted Emergency IP44 3 Hours Wireless Black	6971103537677	53767

Our emergency luminaires are available in recessed, rod and surface mount options, The Ledfire range (pictured) is a non-maintained, energy efficient emergency luminaire with reliable design and quality Lithium (LiFePO_4) iron phosphate batteries.

LED FIRE

FEATURES

QUALITY COMPONENTS

All Ektor Ledfires are built with quality components and undergo extensive testing.

CHOOSE YOUR STYLE

Ektor Ledfires are available in black or white finishes to suit your decor

POWER SAVING

Save money without compromising on design through the low power consumption of the Ledfire.

MOUNTING OPTIONS

SURFACE

Surface mount models allow for easy mounting onto exposed concrete with rear or side cable entry.

RECESSED

Recessed mounting suits a wide range of hole sizes and comes with a removeable outer ring for added installation flexibility.

ROD MOUNTING

These kits allow surface mount Ledfires to be suspended at a lower height.

LED FIRE SURFACE MOUNT

ALL LEDS ON

Center LEDS ON

Outer LEDS ON

The Twinspot (pictured) with powerful dual floodlights and an IP65 rating, is perfect for indoor or outdoor use. Available in black or white and suitable for applications where traditional fittings are difficult to mount. The Twinspot features two moveable heads, allowing light to be directed where it's needed most.

TWINSPOT

FEATURES

WEATHERPROOF

For those more demanding environments, the Twinspot provides levels of protection against dust and harsh weather.

LITHIUM BATTERIES

All Twinspots use quality Lithium LiFePO_4 batteries. These are environmentally friendly and allow for maximum charging efficiency.

LYNK

Connect emergency products into a wireless mesh for simpler and easier emergency testing and monitoring.*

MOVEMENT

DOWNWARD MOVEMENT

Up to 40-degree headlight downward range of movement.

SIDEWAYS MOVEMENT

Up to 45-degree headlight sideways movement.

UPWARD MOVEMENT

Up to 40-degree headlight upward range of movement.

* Available on selected models

Sturdy IK08 square bulkhead (pictured) with IP65 weatherproof rating, tri-color control and corridor function is a safe choice. Emergency and non-emergency models available, with or without sensor.

QUADRO

FEATURES

SELF TEST

Reduce ongoing site time and costs by automating easy testing with this smart emergency.

CORRIDOR MODE

Corridor mode, optimised for use in walkways. Available on Advanced and Professional models.

WIRELESS MESH

With zencontrol technology the Quadro will automatically test and sync data to the zencontrol IoT cloud.

OVERVIEW

MICROWAVE MOTION SENSORS

Optimise and save energy with your lights. Both emergency and non-emergency models come with a sensor option.

COLOUR CHANGE OPTIONS

Advanced models are available in tri-colour. Professional models have colour tuneable white, allowing adjustment for a better working environment.

WEATHERPROOF RATINGS

For demanding environments, the Quadro provides protection against dust and weather with a IP65 rating and impact with an IK08 rating.
