## System overview: modes

104 mode is enabled after the device has been added to a 104 application controller such as zc-iot-fc.

104 + 101 Bridge mode is enabled after the device has been added to a 104 controller and a 101 power supply has been connected to the DALI terminals.

**101 mode** is enabled after a 101 power supply has been connected to the DALI terminal and the device has not been added to a 104 application controller.
